Ministry of Housing, Communities & Local Government

Synopsis of announcement on Local Government Reorganisation (LGR) 25th March 2026

1. Core Announcement: A Major Structural Reset of Local Government

Today's announcement confirms one of the largest restructurings of English local government in decades, focused on abolishing two-tier systems and replacing them with unitary authorities.

43 existing councils (county + district) will be abolished and replaced by 15 new unitary councils across:

- Essex
- Hampshire (incl. Solent area)
- Norfolk
- Suffolk

This is part of the Government's wider devolution and growth agenda, rooted in the English Devolution White Paper (2024) and subsequent programme.

Key structural shift:

Move from two-tier (county + district) ➜ single-tier (unitary) governance
Each new authority will deliver all local services (planning, housing, social care, waste, highways, etc.)

2. Geography & Design of New Authorities

Fast-track areas confirmed today

- Essex → 5 unitary councils
- Hampshire & Solent → 5 unitary councils
- Norfolk → 3 unitary councils
- Suffolk → 2–3 unitary councils (combined total of 3 with Norfolk in announcement framing)

Key spatial changes

Urban expansion of major cities:

- Southampton
- Portsmouth
- Norwich
- Ipswich

These cities will have expanded boundaries, absorbing surrounding areas.

Policy intent:

- Overcome district-level resistance to housing development
- Enable strategic planning at functional economic area level

Areas not yet decided

East Sussex & West Sussex → delayed decision, further consultation required

3. Strategic Policy Objectives

The reorganisation is explicitly tied to three central government priorities:

1. Housing delivery

- Supports the national target of 1.5 million homes by 2029
- Removes planning fragmentation and “NIMBY” veto points
- Aligns urban boundaries with real housing markets

2. Economic growth

Larger, more coherent authorities expected to:

- Improve infrastructure planning
- Align with sub-regional economies
- Strengthen delivery of growth strategies

3. Public service integration

Single authorities expected to:

- Reduce duplication
- Integrate services (especially adult social care + housing)
- Improve accountability

Government framing emphasises “councils that match the modern realities of our places”

4. Scale, Governance & Representation Changes

Political impact:

Around 800 councillor roles will be removed
Fewer, larger authorities = more centralised local representation

Elections to new councils: expected 2027
Shadow authorities + transition: 2027–2028
Full implementation (“go live”): April 2028

5. Shift in Government Approach (Important Policy Change)

A notable shift from earlier policy, with the implication being that the Government are prioritising local identity and political deliverability, with over strict economies of scale, which may create tension with earlier reform principles.

6. Financial & Delivery Implications

Claimed benefits

- ✓ Reduced duplication of senior roles
- ✓ Streamlined governance
- ✓ Potential long-term efficiency savings

Risks and concerns

- Loss of economies of scale in social care (estimated cost pressures cited up to £180m–£270m)
- Transition costs and disruption to services
- Need for significant programme management capacity locally

Central government support

Government has indicated willingness to intervene in legacy financial issues (e.g. debt support in some areas)

7. Relationship to Devolution & Combined Authorities

This reform is not standalone—it aligns with:
Devolution Priority Programme (DPP)
Creation of new combined authorities and mayors (by 2028)

Strategic logic:
Unitary councils = delivery bodies
Combined authorities = strategic tier (transport, skills, growth)

8. Sector Reaction & Emerging Debate

Supportive arguments

- ✓ Simplifies governance
- ✓ Enables strategic planning
- ✓ Better alignment with economic geography

Concerns about:

- Disruption to services
- Cost of transition
- Potential political motivations (e.g. boundary changes benefiting certain parties)

County voices argue proposals:

- May fragment services like social care
- Depart from evidence-based 500k population model

9. What Happens Next

Immediate next steps:

- ➢ Parliamentary approval of decisions
- ➢ Local transition planning begins
- ➢ Shadow governance arrangements established
- ➢ Upcoming decisions

Further LGR decisions expected:

- Sussex (pending consultation)

- Oxfordshire & Berkshire (expected July 2026)

10. Big Picture Takeaways

- This is a structural + political reform
- Not just efficiency-driven
- Strongly linked to housing and growth agenda
- A move toward “place-based statecraft”

Aligning governance boundaries with:

- Labour markets
- Housing markets
- Economic geographies

But with trade-offs:

- Efficiency vs local identity
- Scale vs responsiveness
- Speed vs implementation risk
